

DROP-IN HIV TESTING

2/21/2008

California collects date of birth and the first letter of people's last names during "anonymous" HIV testing. This data makes it possible for you to be identified. To preserve your anonymity, "Don't Ask, Don't Tell": refuse to provide this information when you are HIV tested. The Berkeley Free Clinic does not collect this information in order to maintain the integrity of anonymous HIV testing.
